## Philosophy

Welcome to C&P Celadon. We are pleased to present a selection of our finest stoneware – durable, functional and stunning in its sophisticated simplicity.

We are a small family-run ceramic factory that creates simple yet special stoneware products with infinite possibilities. We handcraft unique products customized to our clients' specifications, and we go the extra mile to make beautiful things possible.

We take pride in our mission to design and produce celadon, ceramic tableware and other ceramic accessories of the finest quality that enhance the living and dining experience for all.

## Our Story

Our founder, Pornchai Potikanon, graduated from Ecole Hoteliere de Lausanne (Switzerland) and spent a quarter of a century successfully managing numerous five-star hotel operations in Southeast Asia. With his knowledge and commitment to service excellence, he and his wife Chawewan founded C&P Celadon in 1999 in the small village of Ladya in Kanchanaburi province near the River Kwai in Thailand. Here our products are still created by local artisans in our factory, reflecting our commitment to sustainability and support of the local community.

Now with twenty years in the HORECA business, you'll find our products present in most premium hotel brands in the world. Customers consistently return to us for quality, superior service and flexibility in meeting their unique requirements.

With daughter Nij Potikanon running the operations, C&P Celadon has refined its brand identity and taken a fresh approach with celadon and ceramics to meet the more diverse needs of today's chefs and restaurants. The Potikanon's son, Pakapol, is the colour specialist who develops and perfects countless shades of colours available today. We continue to apply Mr. Pornchai's standards of service excellence and innovation to the art of celadon and ceramic ware.

## Our Products

Celadon is a French term defining soft jade green coloured glazed ceramics that have crackles on the surface. Traditionally the special celadon glaze is made of a combination of wood ashes with the clay and then fired at very high temperatures in the kiln.

Our contemporary method of crafting celadon glazes has now enabled us to offer not only jade green but many more celadon colours. We use 100% natural materials that are forest-friendly.

In addition, we also offer natural non-celadon glazes, including matte, semi-matte, and glossy finishes in numerous exquisite colours. Every piece is handmade and is strong and suitable for hotel and restaurant use.

## Colours and Custom Designs

Our items are not ordinary or mass-produced. If you are looking for something unique, with distinct personality or simply a few pieces that convey the artistry of your brand. We are here to help you do just that. Our team will work with you to create something you desire.

With more than 100 colours and 2000+ designs (and growing), we offer something for everyone. Glaze colours are created in house using only natural materials. Any colours you see in this catalog can be applied on most items. Variances in shade, effect, and texture are considered a normal part of the process, as the natural materials create this artistic magic during firing.

For a new design, there is a minimum order of only 50 pieces. New colour request can be made possible.

## Sustainability

**Social:** From the beginning, our intention has been to create jobs and keep our local community vibrant and strong. Villagers, mostly from within 5 km radius, are employed here to become fine artisans.

**Environment:** A clean environment is vital to our existence, and we have been awarded annually since 2014 for being a “Green Industry” by the Thai government. Our excess clay is recycled, and we use the old grounded plaster ware as landfill for construction. Water from the glazing department is filtered before being released into local waterways. Dust, heat, and lights are inspected by an independent agency annually to ensure compliance with international health and worker safety standards. Our products contain no harmful substances and are certified lead- and cadmium-free.

**Conical Bowl**
