All silverware oxidize during the course of time. The more aggressive the environment is, the quicker silver will be oxidized.

Most cleaning agents are corrosive and abrasive, which is harmful to both silverware and the environment, some of them are even hazardous to human health.

Thanks to Swiss made Moreillon special formulated polishing and deoxidizing soap powder, together with Swiss technique, WB-01 Polishing machine and WD-01 Deoxidizing machine, we are able to take care of silverware, much effective, economical, elongate usage life, easy to operate and environmental protection.

所有银器都会由于岁月流逝而氧化，环境污染越严重，金属表面越容易氧化。

大部分除氧剂都含腐蚀性或磨损物质，对金属本身及环境都会造成不可逆转的破坏。

本系列复原流程采用瑞士Moreillon特别配方可自然降解的抛光剂及除氧浸泡剂，配合源于瑞士精湛工艺的WB-01抛光机及WD-01浸银机，我们更有效，更经济，更环保，更简易地维护及延长阁下银器的使用寿命。
